

CREATIVE DESIGN

Adobe Illustrator Course in Malaysia: Graphic Design & Vector Illustration

Master the vector design skills used to create logos, illustrations, brand assets and scalable artwork for print and digital media.

DURATION

2 days

DELIVERY

Public or in-house

Why this programme

Adobe Illustrator is the industry-standard tool for vector graphics. This practical course develops the workflow and visual problem-solving skills needed to build clean, flexible artwork for branding, marketing, publishing and digital applications. Participants progress from the workspace and selection tools to drawing, colour, typography, layers and professional export, completing practical exercises throughout the programme.

What participants will learn

- 01** Navigate Illustrator, artboards and selection tools with an efficient workflow.
- 02** Create and transform shapes using Pathfinder, alignment and precision controls.
- 03** Draw and edit vector paths using Pen, Pencil and related illustration tools.
- 04** Apply colour, gradients and typography, then export production-ready artwork.

Who should attend

Graphic designers, marketing teams, business owners, content creators, freelancers and design beginners.

How you will learn

Guided demonstrations and design exercises build towards a practical vector project. Review and feedback focus on clear visual decisions, clean artwork and reliable output.

Detailed programme

Design foundations and vector construction

01 Design context and responsible practice

- Understand vector and raster graphics, scalability and the needs of print and digital platforms.
- Work with audience requirements, brand guidelines, references and feedback.
- Consider copyright and the licensing of fonts, images and artwork.

02 Documents, workspace and assets

- Create artboards and document presets with appropriate units, bleed and colour modes.
- Navigate the workspace, tool panels and useful shortcuts.
- Organise layers, libraries and symbols for a clear project structure.

03 Shapes, alignment and precision

- Create and edit geometric shapes using selection and transformation tools.
- Combine and refine objects with Pathfinder and Shape Builder.
- Use grids and alignment to construct consistent logos and icons.

04 Vector paths and illustration

- Draw and edit paths with the Pen, Pencil and Curvature tools.
- Control Bezier curves, anchor points and strokes.
- Use Image Trace and Live Paint to develop and refine vector artwork.

PRACTICAL APPLICATION

A portfolio-ready vector design project.

Detailed programme

Creative application and professional output

05 Colour and typography

- Apply swatches, global colours, gradients and transparency.
- Create area type and type on a path, with a clear text hierarchy.
- Refine colour and typography to support the design purpose.

06 Brushes, patterns and appearance

- Create and apply custom brushes and repeating patterns.
- Use the Appearance panel and selected stylise, distort and transform effects.
- Explore 3D effects and perspective tools within an illustration workflow.

07 Brand applications and professional output

- Develop logo and icon applications in a practical design project.
- Prepare and package artwork for print, web and digital delivery.
- Choose suitable file formats, compression and export settings.

08 Project review and optional exam preparation

- Review completed artwork against design, technical and output requirements.
- Use practice tasks and mock questions when preparing for the Adobe Certified Professional exam.
- Confirm exam inclusion and arrangements with ISDS; certification requires passing the relevant exam.

PRACTICAL APPLICATION

A portfolio-ready vector design project.

TRAINER PROFILE

Yavinesh

A trainer with a professional background in desktop publishing, graphic design and multimedia. His teaching experience spans Adobe creative applications, UI and UX, video editing, motion graphics, CAD and 3D production for working adults and educators.

Trainer availability is confirmed for each programme.

HRD Corp claimable training is arranged through Orange Revolution. Confirm programme eligibility and claim arrangements with ISDS before booking.
